

Concerning the LPFM stations, I would like to send a support to the national station of K-LOVE. This station provides me, my family, and community with a station that is positive and safe for my family to listen to. If removed from the air we would not have an acceptable alternative radio station and our community would be lacking this type of genre. This station provides a worldwide community where I am listening to the same music and receiving the same news as every other listener, no matter where they are listening world wide. I live in a small Montana community that is cut off many times from the rest of the world and this provides a way to talk to others with the same beliefs and listen to what others have to say from a different point of view. Our community would be losing a gem if this was removed from our airway. I ask you not to force stations like K-LOVE off the air - they provide a much needed service. Thank You
